

December 12, 2014

Dr. B. Henry, MD, MPH
Deputy Provincial Health Officer
British Columbia
#501 - 100 Park Royal South
West Vancouver, BC, V7T-1A2

Dear Dr. Henry,

Non-Thermal Radio Frequency Radiation.

It is every informed British Columbian's earnest hope that you will be selected to succeed the inexcusably ignorant, heartless and corrupt Dr. Perry Kendall, whose legacy shows that throughout his 15 year tenure as PHO, he allowed himself to stay insulated/isolated from what honest eminent scientists (those not paid by industry) around the world know is proving to be the scourge of mankind: non-thermal radiation. This is the radiation emitted by all of today's wireless devices, e.g., baby monitors, Smart Meters, cell phone, cordless phones, cell phone towers, Wi-Fi routers, laptop and tablet computers, etc.! Instead of educating himself on non-thermal radiation, which honest scientists say now blankets virtually every community on earth, Dr. Perry Kendall shamefully chose to simply climb into bed with Health Canada's corrupt Radiation Protection Bureau ("RPB") and its equally corrupt international 'partners' (see below). Historically, the RPB and its partners have stubbornly refused to recognize that non-thermal radiation is harmful to people, flora and fauna. Collectively, they all preach that: "If the radiation does not heat the skin, it cannot be harmful"!

On the premise that you will become British Columbia's next PHO, honest people everywhere pray that you will seize this opportunity to be the first PHO in Canada to finally acknowledge that non-thermal radiation does exist, and that it truly is the scourge of mankind! Because of Dr. Perry Kendall's disgraceful and heartless dereliction of duty over these past 15-years, British Columbians and all flora and fauna in the province have been forced to endure excessive amounts of low-level, pulsed, non-thermal radio frequency radiation emitted by today's constellation of wireless devices – the latest and most dangerous of which are wireless Smart Meters in "meshed-networked" communities!

Dr. Henry, you may already know that honest scientists around the world have long claimed there is a direct correlation between the growth of wireless radio devices and the epidemic growth rates of most of today's major illnesses and diseases, e.g., cancers, Autism, ADD, Alzheimer's, Parkinson's, ALS, to name but a few. They know that the central nervous system and the immune system are particularly susceptible to EMRs and EMFs. No honest person anywhere can possibly dispute the evidence, for it truly is overwhelming!

Non-Thermal Radiation (Cont'd)

Throughout his 15 years in office, Dr. Perry Kendall has steadfastly refused to admit that:

1. Low-level, pulsed non-thermal radio frequency radiation (RFR), the kind emitted by all of today's wireless devices (see list above), is harmful to humans as well as to all flora and fauna! Inexcusably, Dr. Perry Kendall also stubbornly refuses to acknowledge that pregnant women, embryos, children, the sick and the elderly are particularly vulnerable to this pernicious form of radiation – which honest scientists globally have been warning governments about for decades!
2. Or that Extremely Low Frequency (ELF) power-line (60 Hz) electro-magnetic fields (EMFs) are equally harmful to people as well as to all flora and fauna. EMFs are present wherever there is electricity: in household wiring, household appliances, tools, machinery, high voltage transmission and distribution lines, power sub stations, etc. Again, honest scientists have long known that magnetic fields as weak as 4 mG (milli-Gauss) are associated with childhood Leukemia! Yet Dr. Kendall, like his corrupt masters in Health Canada's RPB, flatly refuses to acknowledge that EMFs – at any level - are harmful. For that reason, British Columbians - and all Canadians – are forced to endure magnetic fields of literally ANY strength – even 1000 mG or more! Contrast this with Russia, who have the lowest/safest limits in the world, who allow its citizens to be exposed to just 1.5 mG, or Sweden's, the country with the 2nd lowest/safest limits - 2.5 mG! Yet somehow Dr. Kendall manages to stubbornly defend Safety Code 6, always preaching that it is safe!
3. Or that there is such a thing as electro-hypersensitivity or "EHS." Instead, Dr. Perry Kendall continues to blindly and obediently echo whatever his corrupt masters in Health Canada say. Neither Health Canada nor their disingenuous colleagues in IEEE/ICES/FCC (Institute of Electrical and Electronics Engineers/ International Committee on Electromagnetic Safety/Federal Communication Committee), will admit that such a condition exists! First identified in 1932 by German scientists, EHS has been widely treated in Russia, European and other countries beginning in 1935. Even a former Director General of the WHO, Dr. Gro Harlem Brundtland, MD, MPH, who earlier still had been a two-time Prime Minister of Norway, admitted in 2002, that she suffers from EHS. Even the corrupt WHO now recognizes it! In Sweden, EHS is officially recognized as a disability, so employers and building owners are expected to try to rectify the problems and sufferers may be entitled to disability benefits. While EHS is not an accepted medical diagnosis yet, the Canadian Human Rights Commission recognizes it as an environmental sensitivity and classes it as a disability. But not Dr. Kendall nor Health Canada nor their bedmates!

Had Dr. Perry Kendall not been BC's PHO for these past 15 years -

1. None of today's wireless devices would have been permitted into this province without having undergone prior independent science-based testing to prove it was safe for use by or on the public. To this day, Dr. Perry Kendall appears not to realize that cell phones still have never been tested for safety - anywhere!

Non-Thermal Radiation (Cont'd)

2. British Columbians would know that the radiation from ALL devices is cumulative; it all adds up, much as smoke does in a room where increasingly more smoking people enter the room.
3. British Columbians would know that the harm done to brain cells by the pulsed non-thermal radiation emitted by a cell phone is also cumulative; it too adds up. Scientists know that the time accumulated by someone using a cell phone for just ½ hour per day for 10 years adds up to about 1640 hours, by which time their chances of getting a brain tumor have doubled!
4. British Columbians would know that children's brains absorb about 5X as much radiation as does an adult's.
5. British Columbians would have been warned that every cell phone manufacturer has a warning posted in its Owner's Manual warning the owner not to hold or keep the cell phone anywhere from 5/8" (Apple) to 0.98" (Blackberry) or 1" (Motorola) from any part of their body – not just the head!
6. British Columbians would have been advised that even corrupt Health Canada had recently modified its website such that it now recommends that parents encourage their children to limit their time on cell phones, to use speaker phone whenever possible, and to opt instead for texting;
7. Cell phone towers would not be permitted on daycare centres, schools, hospitals, seniors' homes, residential buildings, apartment buildings, libraries, etc. (It appears that Dr. Kendall is still unaware that President Bill Clinton wrote a Memorandum in 1995 stating that cell phone towers should not be placed near schools or residential areas! Or that the Russian federal government imposes a 2 Km "no-man's land" around cell towers, within which no one can work or live!)
8. Wi-Fi would not be permitted on or in any of the above facilities;
9. Wi-Fi routers in schools are far more powerful than those used in homes.
10. BCUC would not have been permitted to even consider let alone approve Fortis BC's application to install wireless Smart Meters!
11. The many citizens of BC who have had their electricity unceremoniously disconnected by a cruel and heartless BC Hydro would have been saved from such uncivilized treatment - at the hands of their very own provincial electric utility!
12. BC Hydro would not have been allowed to conduct itself as if it were the Mafia: referring to its reprehensible and odious "legacy" fees which it unilaterally imposes on those informed citizens who refuse to allow a Class 2B ("Possible") carcinogen spewing Smart Meter on their home.

Dr. Henry, I implore you on behalf of people, flora and fauna everywhere, but especially those here in British Columbia to:

1. Uphold your Hippocratic Oath: protect all people, fauna and flora living in our wonderful province of British Columbia - which any decent, principled, morally upright, ethically honest and caring physician having a conscience surely would do.
2. Respect that honest scientists the world over have excoriated Health Canada's so-called Safety Code 6 for years - and continue to do so today, because of its obvious failings, namely:

Non-Thermal Radiation (Cont'd)

- a) It applies only to THERMAL radiation, and provides no protection against NON-THERMAL radiation, especially low-level, pulsed non-thermal radiation (the kind emitted by today's wireless devices (see list above); and,
 - b) Its so-called radiation Exposure Limit 'Guidelines', like those of its equally corrupt partners in the WHO, ICNIRP, IEEE/FCC, are amongst the highest (most dangerous) in the world! For example, they are 100 times higher than those in Russia, China, Italy, Switzerland, etc.! Furthermore, the globally-respected ***BioInitiative 2007 Report***, if adopted by Canada, would oblige Safety Code 6 to be reduced by 10,000 times! And five years later, an updated ***BioInitiative 2012 Report***, if adopted by Canada, would oblige Safety Code 6 Exposure Limits to be reduced an unimaginable, seemingly preposterous 3-6 million times!
www.bioinitiative.org
 - c) It does not recognize and therefore does not protect British Columbians from the electric and magnetic fields associated with household electricity, household appliances, etc. (see Power-line EMFs, above);
 - d) It does not recognize and therefore does not protect British Columbians who might suffer from EHS (see electro-hypersensitivity, above).
3. Realize that in 2011, the Council of Europe (47 countries, 800-million people), who historically had followed ICNIRP's radiation guidelines (which are virtually identical to Safety Code 6), issued a Press Release on May 27th urging all its member countries to "reconsider" their reliance on ICNIRP and, instead, follow the radiation guidelines of the BioInitiative 2007 Report (referred to above).

In addition to the BioInitiative 2012 Report, which covers radio frequency EMR, power-line EMFs and EHS, I'd also encourage you to view the ***Seletun Scientific Panel Report of 2011*** <https://www.google.ca/webhp?sourceid=chrome-instant&ion=1&espv=2&ie=UTF-8#q=the%20seletun%20scientific%20statement>
<<https://www.google.ca/webhp?sourceid=chrome-instant&ion=1&espv=2&ie=UTF-8#q=the%20seletun%20scientific%20statement>>

Other noteworthy facts of which you should be aware, if you aren't already:

1. In 2011, the ***American Academy of Environmental Medicine*** (AAEM) urged CPUC (California Public Utilities Commission) to impose a moratorium on Smart Meters.
2. In 2012, the same ***AAEM*** formally stated that: "Government and industry arguments alleging the doubtful nature of the science on non-thermal effects of RF were not defensible. The newest studies show: genetic damage, reproductive defects, cancer, neurological degeneration and nervous system dysfunction, immune system dysfunction, etc." <http://www.globalresearch.ca/looming-health-crisis-wireless-technology-and-the-toxification-of-america/31816>
3. In 2012, Fifty-four (54) experts from twenty (20) countries warned about the dangers of wireless devices such as Smart Meters; and
4. Between 1993 and 2013, a total of eighty-one (81) governments and organizations banned or warned against wireless technology!

Non-Thermal Radiation (Cont'd)

Again, on the premise that you will become British Columbia's next PHO, please note that it is not obligatory for any province or territory in Canada to adhere to Safety Code 6. Health Canada's own website makes that perfectly clear! British Columbia, like other jurisdictions, has the latitude and authority to establish whatever radiation Exposure Limits it deems necessary in order to protect its people. Look, for example, at what the City of Toronto has done. It is my understanding that they have obliged cell phone companies to reduce the effective radiated power of cell phone towers to levels that are 100 times lower than those recommended by Safety Code 6!

In closing, it is my earnest hope on behalf of all British Columbians – indeed, all people, flora and fauna everywhere - that once you succeed Dr. Kendall, you will see firsthand the naked corruption that is rife throughout Health Canada's RPB and its colleagues in Industry Canada, the WHO, ICNIRP, IEEE/ICES and FCC. What you will see, in any honest person's eyes, amounts to a crime against all of humanity! Clearly governments (all levels) learned nothing from the tobacco, asbestos, and Thalidomide fiascos. But informed people everywhere know that today's ubiquitous low-level, pulsed, non-thermal radiation is far worse than anything in mankind's history. Compounding things, radiation cannot be seen, smelled, heard, tasted or touched – yet it is everywhere! No one can escape it! Not even those promoting it or those forcing it upon a defenseless unsuspecting public! The frequencies used in today's wireless devices penetrate all organs of the body as well as buildings and, in the case of some frequencies, even concrete! As happened with tobacco, people today can suffer from 2nd hand radiation – from nearby radiating devices.

So, what is your decision to be, Dr. Henry? Will you choose the easy path, as did your predecessor? Or will you rise to the occasion, assert yourself, and become the first PHO in Canada to truly protect your constituents? Canadian Medical History will record whichever decision you make! Thank you for your time, doctor.

Sincerely yours,
Jerry Flynn
