

*Wireless Radiation Safety Council**

Report Card for the Five Main Federal Political Parties,
April 1, 2010 – March 31, 2011

April 16, 2011

Name of Party	Current Positions on Wi Fi, Towers, etc	Grade to March 31, 2011	Party Contact info
Conservative	Over the last year, the Parliamentary Standing Committee on Health met to discuss microwave radiation and human health. The Conservatives held a majority on that Committee but failed to listen to the expert warnings from scientists around the world and from within our country. They have failed to act to protect our children.	F	Conservative Party of Canada 1204 - 130 Albert Street Ottawa, Ontario K1P 5G4 Toll free: (866) 808-8407 Phone: (613) 755-2000
Liberal	Has commented little on the process. Maria Minna, MP Beaches-East York took action and delivered a petition to the Parliament of Canada when residents of the Beaches neighbourhood of Toronto complained about cell phone transmitters being built next to a daycare. Bloc Quebecois	Several Members have been very active trying to protect Canadians from microwave exposure. Mostly, because	B	Secrétariat national 3730, boulevard Crémazie Est 4e étage Montréal, Québec H2A 1B4

	one of their Members is so sensitive he cannot use a cell phone without getting a headache.		Téléphone: (514) 526-3000 Télécopieur: (514) 526-2868
Green	The Greens have a full written policy calling for dramatic reductions in Health Canada's guidelines on microwave which would reduce exposures dramatically if implemented. Normally this would earn them an "A". However, it is not possible to judge how the Green Party would implement its policies because the party has no sitting MPs, so the WRSC has limited the grade to a "B". New Democratic	The NDP Member from Algoma-Manitoulin-Kapuskasing, Carol Hughes was the hardest-working member of the Health Committee addressing microwave radiation. New Democrat MPs Libby Davies and Alex Atamanenko have also offered their support for the most important cause of the 21 st Century. The NDP gets an "A" for effort and "B+" for effectiveness.
