SafeZone EMF Consulting announces that three of the world's top researchers and lecturers are coming to Kelowna for a full day event called, Wireless Technology's Deadly New Epidemics. This will be a knowledge packed, full day event from 9:30 a.m. to 5 p.m. with an organic lunch provided at the incredible Summerhill Pyramid Winery on November 14, 2015.

This conference will cover new epidemics that have been created by technology over the last three decades. Participants will learn how wireless technology is connected to many new diseases and the increases recently seen in old health problems that are no longer rare.

Dr. Magda Havas, PhD comes from Peterborough, Ontario where she teaches Environmental Science at Trent University. She is a published author and co-wrote "Public Health SOS: The Shadow Side of the Wireless Revolution." She has testified about the dangers of wireless technology for government studies and has lectured all over the world.

Dr. Martin Blank, PhD from Victoria, BC is a world-renowned lecturer who has testified before the United Nations on the dangers of electromagnetic field radiation. He recently released his bestselling book called "Overpowered: The Dangers of Electromagnetic Radiation [EMF] and What You Can Do About It".

Dr. Sam Milham MD, MSH is a world-renowned epidemiologist, medical doctor and researcher in the field of electromagnetic radiation. He has written "Dirty Electricity", a best-selling book about the effects of dirty electrical power on the health decline of industrialized nations.

Presentation done by two well-known electromagnetic field radiation consultants will provide solutions that can be implemented immediately to reduce electromagnetic exposures and help improve people's health. The importance of protecting children and pregnant women will be included.

The day will end with a Q&A panel of all five presenters taking questions concerning topics relevant to electromagnetic field radiation.

This will be a life changing and possibly life-saving event for all participants. Health professionals and the general public are all welcome. A \$30 discount is available to anyone who brings a health professional to this event.
